

2s Class April Newsletter

Dear Parents,

We've been enjoying the change of seasons these past few weeks. We're learning about spring, the weather and working on recognizing our name. Parent-Teacher conferences are tomorrow. We will not have class, but childcare is available during your conference time. A reminder of your time is listed below. Please message me if you are unable to come and need to reschedule. You will be asked to sign in to conferences in the lobby, and the book fair is there too if you want to purchase some books. The book fair will be here all next week too.

Thursday 3/27

8:45 Ben Mantle

9:00 Clara Chou

9:15 Rowan Lammey

9:30 Roman Hunter

9:45 Charlie Martin

10:15 Liam Hughes

10:30 Natalie McCartin

11:00 Amelia Ford

11:30 Jack Stottmann

Friday 3/28/25 9:30 Cora Reed

Next week is a new month. April themes are the color purple, oval shape and Easter stories and crafts. We will continue to work on name and letter recognition and begin sequencing a story too. We will also wish Happy Birthday to Amelia and Clara!!

On Thursday April 3, we will have a special music program come to school. The program consists of signing and dancing utilizing various instruments and props. It will last 30 minutes and replace our music class for the week. It's really fun! The cost of "Play on Music" was included in your yearly field trip fee.

Please remember to send me your camp registration the morning of Wednesday, April 9th if you want your child to attend our camp.

Our Egg Hunt is scheduled for Thursday, April 10. Before that date, please send in 12 filled eggs. You can fill them with nut free candy or other small treats (stickers, etc.). Please plan on arriving before 11:30 and meeting us at the playground. No basket is needed as we will decorate bags in class to use. You will help your child find 12 eggs and are then free to stay and play or leave whenever you like.

Our last day of class before spring/Easter break is Tuesday 4/15. We will return to class on Tuesday 4/29. When we return, we will have caterpillars in the classroom and observe the life cycle of the Painted Lady butterfly!

As always, please let me know if you have any questions.
Helen
